- Potential CRUD APP: Resume Builder
  - Description:
    - This app would allow people to build a resume and personal site in one. The resume can be maintainable after creation (maybe through JSON)
  - Need it addresses:
    - time wasted when choosing a template, too complex personal site creators are everywhere but you just want to make a site without bells and whistles
  - What is unique about it compared to alternatives?
    - Allows changes to be made, only allows one format, limited changes to categories - one template allows for time to be reduced when creating a resume.

- Potential CRUD APP: Movie Club/Blog
  - Description:
    - App that allows people to make a personal page that summarizes their favorite movies, allows for personalized reviews of the movies, personal list of fav movie genres and fav movies from those genres, watchlist
  - Need it addresses:
    - More personalized letterboxd
  - What is unique about it compared to alternatives?
    - It allows for users to be more personal about their feelings towards a movie or a specific genre, sharable and more readable

- Potential CRUD APP: Local-First Social Media Auxiliary
  - Description:
    - Store all of your future social media posts to your local disc. Choose which kind of post you will make (blog, tweet, ig image, etc.), create the post in this app, and the app will store this post locally and "push" an identical copy of this post to the specified social media platform using API calls.
  - Need it addresses
    - Social media apps are deleting posts at increasing rates these days. Your posts should be archived so that they aren't lost forever in this event.
  - What is unique about this app?
    - I don't know of any alternatives

- Potential CRUD APP: copy/paste
  - Description:
    - Allows users to share notes, pictures between devices they own
  - Need it addresses:
    - Difficulty sharing items between different devices
  - What is unique about it compared to alternatives?
    - Large emphasis on speed and responsiveness

- ● Emails take long
- ● Drive takes long, formatting gets messed up

- ● Potential CRUD APP: BeReal thoughts
  - ○ Description:
    - ■ Allows users to post random quotes, thoughts, feelings, experience
    - ■ Has to be within the random two minutes of the day
    - ■ Could answer a prompt, check mood
    - ■ Organizer, Lookback window
  - ○ Need it addresses:
    - ■ Allows people to write their thoughts on a daily basis
  - ○ What is unique about it compared to alternatives?
    - ■ It forces people to write their thoughts at a random two-minutes during the day

- ● Potential CRUD APP: UCSD Events Site
  - ○ Description
    - ■ Real time forum/dashboard site where users can post about "events" at UCSD
    - ■ Students can post under locations on UCSD, and explain what's happening where they're at or what "event" they're attending
  - ○ Need it addresses
    - ■ Sometimes hard to keep track of all the events happening all around campus
    - ■ Users/students can create their own events to promote, or simply share their experience for an event they went to
  - ○ What is unique about it compare to alternatives?
    - ■ Specializes in promotion and blogging of events/occasion for campus. Makes it easier to know what's happening instead of having to check multiple instagram pages or org websites.

- ● Potential CRUD APP: UCSD GPA Calculator +
  - ○ Description
    - ■ Allows UCSD students to calculate custom GPAs by filtering out class type (CSE, MATH, etc.), year (2019, 2020, 2021), or class division (Upper div, lower div), in addition to filters already provided by tritonlink.
    - ■ Makes a copy of a transcript from degree audit and can store for multiple users. You can call the app to fetch a new version of the degree audit for a certain user. You can also remove or add more users anytime.
  - ○ Need it addresses
    - ■ Needs a login every time a fetch is performed (but realistically this is only for every quarter)
    - ■ Automated GPA calculation may not be the most innovative idea
  - ○ What is unique about it compared to alternatives?

- A degree audit requires login, site navigation, and some loading time. Students mostly tend to log on only to see overall GPA or major/minor GPA. This app simplifies the process by doing a one-time "download" of the transcript to perform GPA filtering
- Provides more filtering options that tritonlink doesn't offer
- Does GPA calculations for you

- Potential CRUD APP: UCSD Food Reviewer:
  - Description:
    - Allows UCSD students to submit food reviews (good/bad tastes, good/bad values etc.) to the site
    - Acts similar to GitHub where you can pull other people's review to your local, and push your own reviews so other people can download them
  - Need it addresses:
    - Allows students to give feedback on what they think about campus food so people could have more info on what food they should try/avoid
    - A lot of food options on campus so it would be helpful that students don't have to try each out
  - What is unique about it compared to alternatives?
    - There are no alternatives that we know of
